CERTIFICATIONS

Certification in Data Analysis – Entri Elevate In Collaboration with Illinois Tech, US

Mar 2026 – Sep 2026

- Earned certification in Data Analytics covering Python, SQL, Excel, and Power BI.
- Completed hands-on projects using real-world datasets for data cleaning, analysis, and visualization.
- Built interactive dashboards and generated actionable insights to support business decision-making.

Certification in Python [Source Code] Computer Software College (CSC)

Jan 2024 – Mar 2024

- Learned core Python programming concepts including variables, loops, functions, and object-oriented programming.
- Developed hands-on experience in data handling, automation, and problem-solving using Python.
- Worked on practical projects involving file handling, libraries, and basic data analysis applications.

Certification in Type Writing [Source Code] Dept. of Technical Education, Govt. of Tamil Nadu

Mar 2023 – Aug 2023

- Completed English Typewriting Senior Grade certification with proficiency in speed and accuracy.
- Demonstrated strong typing skills, formatting techniques, and efficient document preparation practices.

SKILLS

Programming Languages: Python, C, C++, SQL, Pandas, Matplotlib, Seaborn **BI Tools:** Power BI, Tableau
Office Tools: Microsoft Excel **Typing Skills:** English Typewriting
Concepts: Exploratory Data Analysis, Data Cleaning, Data Modeling, Statistics

PROJECTS

Microsoft Excel – E-Commerce Analysis [Source Code]

- Analyzed e-commerce sales data to understand customer purchasing behavior and product performance.
- Used Excel tools such as Pivot Tables, charts, formulas, and functions for data analysis.
- Performed data cleaning by removing duplicates, handling missing values, and organizing raw datasets.
- Created interactive dashboards (Top Customers, Store Performance, Monthly Sales, Top Products, Gender-wise Sales) to analyze sales trends and business performance.

Diabetic Health Risk Analysis – Python Power BI [Source Code]

- Cleaned and transformed 5,000 patient records using Python and Pandas, handling missing values and creating meaningful groups for glucose, insulin, BMI, and age.
- Analysed health and lifestyle factors including glucose, insulin, BMI, heredity, exercise, diet, smoking, alcohol, stress, and sleep to identify patterns associated with diabetes status.
- Developed interactive Power BI dashboards with charts and visualizations to compare diabetic, non-diabetic, and unknown-status groups and communicate key analytical insights.

EXPERIENCE

- **Production Associate**
Foxconn India Pvt. Ltd.

Sriperumbudur, Chennai
Jun 2024 – Feb 2026

EDUCATION

- **Bachelor of Science in Mathematics | Grade: D+**
Alagappa University

Karaikudi, Sivaganga
Jun 2021 – May 2024
